Editorial Review

Review

"While the psychoanalytic literature on male homosexuality has been rather extensive, that on female homosexuality has been sparse. This volume contains the most comprehensive clinical investigation of this subject and the largest sample of female homosexuals treated by a single psychoanalyst. This is a thoughtful, comprehensive contribution to the subject of female homosexuality. The author's highly original formulations, practical applications, and case studies are of considerable interest and value. This is a book that will not gather dust on the shelf." - Theo L. Dorpat, M.D., Contemporary Psychiatry "The material is well organized and instructive, with many references. The case studies, in particular, present an illuminating picture of the analytic process and the author's point of view. This scholarly book is a welcome and timely addition to the limited clinical literature on female homosexuality." - Frida G. Surawicz, M.D., Journal of Clinical Psychiatry "On the basis of extensive psychoanalytic experience, as well as an extensive review of psychoanalytic theory, the author provides an ego-development/object-relations view of female homosexuality. Included are eight detailed case studies and a chapter on parental profiles, as well as a chapter on countertransference. This careful study is bound to become a key reference in the area." - Bulletin of the Menninger Clinic

Users Review

From reader reviews:

Curtis Russell:

As people who live in often the modest era should be up-date about what going on or facts even knowledge to make these individuals keep up with the era that is always change and progress. Some of you maybe can update themselves by reading books. It is a good choice for yourself but the problems coming to a person is you don't know what one you should start with. This Autoclaved Aerated Concrete - Properties, Testing and Design (Rilem Recommended Practice) is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

Robert Densmore:
