## **Editorial Review**

### **Review**

"Cognitive Neuroscience is different. It's an excellent book and a jolly good read." THE

### **From the Back Cover**

Modeled on the classic Neuroscience Study Program volumes which helped delineate an emerging field, The Cognitive Neurosciences is a major new reference that documents and defines the evolving field of cognitive neuroscience.

### **About the Author**

Michael S. Gazzaniga is Distinguished Professor and Director of the Sage Center for the Study of the Mind at the University of California, Santa Barbara. In his career, he has introduced thousands of students to psychology and cognitive neuroscience.

Richard B. Ivry is Professor of Psychology and Neuroscience at the University of California, Berkeley. He received his Ph.D. from the University of Oregon. His research focuses on the relationship of cognition and action, using the many methods of cognitive neuroscience. Dr. Ivry is a senior editor for the Journal of Cognitive Neuroscience and serves on the editorial boards of a number of other journals. Among his many honors, Dr. Ivry received the Troland Research Award from the National Academy of Sciences in 1997, and was elected a fellow of the Society of Experimental Psychologists in 2003 and the Association for Psychological Science in 2006.

George R. Mangun is Professor of Psychology and Neurology in the Center for Mind and Brain at the University of California, Davis. He received his Ph.D. from the University of California, San Diego. He was the founding director of the Center for Mind and Brain, and also of the Center for Cognitive Neuroscience at Duke University. In 1992, with Michael S. Gazzaniga and others, he founded the Cognitive Neuroscience Society. Dr. Mangun serves as an associate editor for the Journal of Cognitive Neuroscience, and is Editor-in-Chief of the series The Neuroscience of Attention, published by Oxford University Press. He uses cognitive neuroscience tools in the study of brain attention mechanisms. He is a fellow of the Association for Psychological Science, and the American Association for the Advancement of Science.

## **Users Review**

### **From reader reviews:**

#### **Sally Watts:**

What do you consider book? It is just for students as they are still students or it for all people in the world, the actual best subject for that? Just simply you can be answered for that issue above. Every person has various personality and hobby per other. Don't to be pushed someone or something that they don't would like do that. You must know how great along with important the book Cognitive Neuroscience: The Biology of the Mind, 4th Edition. All type of book is it possible to see on many methods. You can look for the internet resources or other social media.

**Rhonda Robitaille:**

The reason why? Because this Cognitive Neuroscience: The Biology of the Mind, 4th Edition is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will jolt you with the secret the idea inside. Reading this book adjacent to it was fantastic author who also write the book in such wonderful way makes the content on the inside easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this anymore or you going to regret it. This phenomenal book will give you a lot of rewards than the other book get such as help improving your ability and your critical thinking way. So , still want to hold off having that book? If I ended up you I will go to the guide store hurriedly.

**Charlsie Sprouse:**
