—**Narayan Y. Naik**

"This excellent introduction to the world of hedge funds takes the reader on a tour of the wide variety of strategies employed by these often mysterious but increasingly important investment institutions. Both students and professionals will value the nicely organized presentation that combines insightful discussions with many interesting facts and figures."

—**Robert Stambaugh**

### **From the Back Cover**

Since the first hedge fund was launched in 1949 by Alfred Winslow Jones, the industry has grown impressively. In 2005 it reached the record size of 1.3 trillion dollars and 8000 hedge funds. Responsible for a big slice of the daily trading volumes of financial markets, hedge funds are among the top clients for brokers, given the level of trading fees they generate.

The hedge fund world is a very heterogeneous one: there are hedge funds that encompass only a few people and those with trading floors bigger than soccer fields. The hedge fund world seems to be the place where the ability to generate positive uncorrelated returns resides, even though performances are not publicly disclosed.

And still, this remarkable phenomenon is surrounded by an aura of mystery. Using real-life examples and case studies, this book provides an intensive learning experience, and helps readers understand the investment strategies of hedge funds showing them how they can invest to make money in an uncorrelated way with financial markets.
