Mastering XPages: A Step-by-Step Guide to XPages Application Development and the XSP Language (2nd Edition) (IBM Press) By Martin Donnelly, Mark Wallace, Tony McGuckin

IBM's Best-Selling Guide to XPages Development–Now Updated and Expanded for Lotus Notes/Domino 9.0.1

XPages instantly revolutionized Notes/Domino application development, and the newest versions deliver unprecedented performance and flexibility. Now, the popular insider's guide to XPages development has been updated and expanded to reflect all these improvements, through IBM Notes/Domino 9.0.1 and beyond.

Three key members of the IBM XPages team have brought together comprehensive knowledge for delivering outstanding solutions. They have added several hundred pages of new content, including four new chapters. Drawing on their unsurpassed experience, they present new tips, samples, and best practices reflecting the platform's growing maturity. Writing for both XPages newcomers and experts, they cover the entire project lifecycle, including problem debugging, performance optimization, and application scalability.

This second edition of *Mastering XPages* fully addresses enhancements to the XPages data sources for Domino views and documents; the latest XPages mobile library; the new Domino Designer Server-Side JavaScript debugger; and improvements to integrated technologies such as Dojo and CKEditor.

Nearly every chapter contains at least one downloadable sample application, offering extensive hands-on practice. This guide concludes with complete references to XSP tags, relevant Java/JavaScript classes, and XSP style classes.

Coverage includes

* Understanding XPages' development paradigm, tooling, runtime framework, and application architecture
* Configuring Domino Designer and integrating XPages Extension Library
* Constructing application logic and using data binding controls

* Reading/writing Notes documents: from use cases to design properties
* Using Views, including examples of accessing calendars via REST
* Making the most of Notes/Domino 9.0's new DataView control
* Coding: from the basics to fully customized behavior
* Advanced scripting: AJAX, Dojo, @Functions, managed beans, and more
* Extending the Rich Text Editor's functionality
* Building and consuming new controls with Extensibility APIs
* Taking web applications offline in the Notes client
* Building mobile apps: controls, design patterns, and best practices
* Debugging Server-Side JavaScript with Domino Designer 9.0
* Creating apps that look and work great–for local and global audiences
* Systematically optimizing performance and scalability
* Protecting data and users: leveraging Domino and Notes security models

Editorial Review

About the Author
The authors of this book have a number of things in common. All three hail from Ireland, work for the IBM Ireland software lab, and have made significant contributions to the development of XPages over the past number of years.

Martin Donnelly is a software architect and technical lead for the Domino Designer and XPages teams in IBM Ireland. He has worked on all XPages releases to date and also on a precursor technology known as XFaces. Martin was also a development contributor to such products as the IBM Java Visual editor and IBM Rational Application Developer. In the 1990s while living and working in Massachusetts, Martin was a lead developer on Domino Designer; this has now gone full circle as he rejoined the Domino Designer team in 2013 to head up the 9.0.1 release. Martin lives in Cork with his wife Aileen, daughters Alison, Aisling, and Maeve, and retired greyhounds Evie and Chelsea. Outside of work his main leisure time pursuits are soccer, fishing, and gardening.

Mark Wallace is a software architect in the IBM Ireland software lab. In the past, he worked on the XFaces runtime, which was developed for Lotus Component Designer and subsequently evolved into the XPages runtime. He has a keen interest in programming models and improving developer productivity. Mark has worked in Lotus and IBM for more than 17 years on various products, and he is currently leading the Social Business Toolkit open source project. Mark lives in Dublin with his wife and two children and spends as much time as possible in the Ireland's sunny south east enjoying fishing and kayaking with his family.

Tony McGuckin is a senior software engineer in the IBM Ireland software lab. Having studied software engineering at the University of Ulster, he began his career with IBM in 2006 and joined the XPages core runtime team shortly thereafter. When not directly contributing to the core runtime, Tony is busy with software research and development for the next generation of application development tooling, most recently focusing on mobile and responsive design. Tony also spends a lot of time directly engaging with IBM customers as an XPages consultant, where he shows his flair for UI development and his deep understanding of application performance. Tony enjoys spending time with his wife and daughter, and getting out into the great outdoors for hill walking and the occasional chance to do some hunting in the surrounding hillsides of his native County Derry.
