Architecting Composite Applications and Services with TIBCO (TIBCO Press) By Paul C. Brown

“Paul Brown has done a favor for the TIBCO community and anyone wanting to get into this product set. Architecting TIBCO solutions without knowing the TIBCO architecture fundamentals and having insight to the topics discussed in this book is risky to any organization. I fully recommend this book to anyone involved in designing solutions using the TIBCO ActiveMatrix products.”

—Nikky Sooriakumar, TIBCO Architect, PruHealth

“An effective primer for building composite services using TIBCO, this book provides a holistic approach to strategy integrated with implementation details. I find it tremendously useful in moving recursively from business solutions to design patterns to architecture. Tangible examples are provided that build to composite services. And advanced topics are explored that add another valuable implementation dimension. I recommend this book to software architects who need to quickly build an effective business- services-oriented environment.”

—Abby H. Brown, Ph.D., Enterprise Architect, Intel Corp.

The architecture series from TIBCO® Press comprises a coordinated set of titles for software architects and developers, showing how to combine TIBCO components to design and build real-world solutions. TIBCO’s product suite comprises components with functionality ranging from messaging through services, service orchestration, business process management, master data management, and complex event processing.

In composite applications and services, multiple components collaborate to provide the required functionality. There are many possible architectures for these distributed solutions: Some will serve the enterprise well, while others will lead to dead-end projects. *Architecting Composite Applications and Services with TIBCO®* shows how to create successful architectures with TIBCO products for both overall solutions and individual services. This guide builds on the basic design patterns and product information presented in the first title in

the series, TIBCO® Architecture Fundamentals (Addison-Wesley, 2011).

After reading this title, you will be able to

- Create architectures for solutions, service specifications, and service implementations
- Understand the intended TIBCO product roles in composite applications and services
- Define manageable approaches to service versioning and naming
- Conduct and interpret performance benchmarks
- Identify and select appropriate design patterns for a variety of tasks

Architecting Composite Applications and Services with TIBCO® is intended primarily for project architects defining overall solutions and specifying the supporting components and services. TIBCO developers, enterprise architects, and technical managers will also find material of interest. No specific prior knowledge of architecture is assumed.

Editorial Review

About the Author

Dr. Paul C. Brown, a Principal Software Architect at TIBCO Software Inc., is the author of *Succeeding with SOA* (Addison-Wesley, 2007), *Implementing SOA* (Addison-Wesley, 2008), and *TIBCO® Architecture Fundamentals* (Addison-Wesley, 2011), and is a coauthor of the SOA Manifesto (soa-manifesto.org). Dr. Brown's extensive design work on enterprise-scale information systems led him to develop the concept of total architecture, which explains how business processes and information systems are so intertwined that they must be architected together.

Users Review

From reader reviews:

Marian Perkins:

Now a day those who Living in the era exactly where everything reachable by connect with the internet and the resources inside it can be true or not involve people to be aware of each info they get. How a lot more to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Reading through a book can help individuals out of this uncertainty Information specially this Architecting Composite Applications and Services with TIBCO (TIBCO Press) book because this book offers you rich facts and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it everybody knows.

Lisa Lee:

The event that you get from Architecting Composite Applications and Services with TIBCO (TIBCO Press) is the more deep you excavating the information that hide within the words the more you get serious about reading it. It doesn't mean that this book is hard to comprehend but Architecting Composite Applications and Services with TIBCO (TIBCO Press) giving you buzz feeling of reading. The article writer conveys their point in a number of way that can be understood by anyone who read this because the author of this book is well-known enough. This particular book also makes your own vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We suggest you for having this particular Architecting Composite Applications and Services with TIBCO (TIBCO Press) instantly.

Karen Rodriguez:

The book untitled Architecting Composite Applications and Services with TIBCO (TIBCO Press) contain a lot of information on this. The writer explains your girlfriend idea with easy means. The language is very straightforward all the people, so do not really worry, you can easy to read the idea. The book was published by famous author. The author gives you in the new time of literary works. You can easily read this book because you can read more your smart phone, or model, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can open their official web-site and also order it. Have a nice

study.

Sylvester Perkins:

This Architecting Composite Applications and Services with TIBCO (TIBCO Press) is new way for you who has intense curiosity to look for some information since it relief your hunger info. Getting deeper you into it getting knowledge more you know otherwise you who still having small amount of digest in reading this Architecting Composite Applications and Services with TIBCO (TIBCO Press) can be the light food for yourself because the information inside this particular book is easy to get by means of anyone. These books develop itself in the form that is certainly reachable by anyone, yep I mean in the e-book contact form. People who think that in e-book form make them feel sleepy even dizzy this book is the answer. So there is absolutely no in reading a reserve especially this one. You can find actually looking for. It should be here for you. So , don't miss the idea! Just read this e-book style for your better life in addition to knowledge.
