Bassoon Vibrato Production: Observations of the Larynx By Scott Pool

The role of the larynx has often been overlooked as an important factor in vibrato production on the bassoon. In 2004, Dr. Scott Pool sought to find answers to his questions regarding vibrato production and the function of the throat. His observations revealed new revelations into how the larynx played a key role in this important element of bassoon tone and technique. By understanding how the larynx affected bassoon vibrato, Dr. Pool was able to apply new insightful information to both his own performance and teaching strategies. Both teachers and performers of the bassoon (and other wind instrument) will want to read this study, which discusses the mechanics behind the larynx and vibrato as an important element of musical artistry.
