**The fourth book in the blockbuster phenomenon MAZE RUNNER SERIES now features chapters from *The Fever Code*, the highly-anticipated conclusion to the series—the novel that finally reveals how the maze was built!**

Before WICKED was formed, before the Glade was built, before Thomas entered the Maze, sun flares hit the earth, killing most of the population.

Mark and Trina were there when it happened. They survived. But now a virus is spreading. A virus that fills humans with murderous rage.

They're convinced that there's a way to save those who are left—if they can stay alive. Because in this new, devastated world, every life has a price. And to some you're worth more dead than alive.

*The Maze Runner* and *Maze Runner: The Scorch Trials* are now major motion pictures featuring the star of MTV's *Teen Wolf*, Dylan O'Brien; Kaya Scodelario; Aml Ameen; Will Poulter; and Thomas Brodie-Sangster. The third movie, *Maze Runner: The Death Cure*, will hit screens in 2018.

#### A Letter from James Dashner: Top Ten Things I'd Want During the Apocalypse

10. Very, very strong sunglasses.

9. Lots of plastic to wrap around my house.

8. A stranger taken in who happens to be the smartest, ablest doctor in a thousand years.

7. A server containing every show that's ever been on HBO and a nice entertainment system on which to watch it all.

6. An e-reader loaded with 5,000 books.

5. A generator and a gas refinery next door to provide fuel so I can watch all those shows and charge my e-reader.

4. Deodorant that smells like a rotting dead body so zombies think I'm just one of them.

3. Lifetime supplies in my basement of the following: hot dogs, Almond Joys, potato chips, and Mountain Dew.

2. A cloaking device to hide my house from the tyrannical, evil, bloodthirsty government that will inevitably spring up.

1. Oh, and my wife and kids.

From School Library Journal

Gr 7 Up-In his short life, Mark has seen sun flares that killed millions, including his family and beloved younger sister. Afterward, floods, food shortages, and continued devastating heat, along with individuals bent on surviving at all costs, have made his chances pretty bleak. Against all odds, he and a close-knit group

of other survivors move inland and set up a community together. But before long, a flying ship brings something wholly unfamiliar: a disease, transmitted initially by darts, but soon spread person to person at an alarming rate. Mark's friends all work together to figure out what this illness is, how it spreads, and why it drives people mad, while trying to hold onto hope for themselves and save others. A prequel to the "Maze Runner" series (Delacorte), this story does indeed show how the world started to fall apart prior to Thomas's time in the Maze. However, Thomas's and Teresa's stories are contained to the prologue and epilogue, so readers hoping for information about how WICKED began will be disappointed. Dashner achieves a high level of emotional involvement for readers in this prequel. Mark knew and loved his family, which makes him a more relatable character than memory-challenged Thomas. The action is nonstop, although a little unrealistic at times, and Mark seems wise beyond his years. This novel works well as a stand-alone.-Kelly Jo Lasher, Middle Township High School, Cape May Court House, NJ ©(c) Copyright 2011. Though Dashner wrapped up his best-selling Maze Runner trilogy with 2011's The Death Cure, he returns to the well with this prequel, telling the backstory of how the world's population came to be infected with the psychotic lunacy disease that would lead scientists to put teens through a series of sadistic tests in the name of finding a cure. We meet Mark and Trina soon after ravenous sun flares wipe out a good swath of humanity, living tooth and nail in a small settlement until a gang of hazmat-suited folks drop from the sky and shoot everyone up with virus-laden darts. The quest to find answers and save their band of friends takes them straight into a bleak heart of darkness. The story's burdened by thin characters, plot contrivances, and generally tortured logic, but the series' many readers aren't in it for the craft. The draw is the gobs of gruesome violence and raving lunacy in the back-to-back, extended action sequences. And there's plenty such fare here, even if it all feels like the stakes are lowered a bit by knowing the inevitable outcome. Grades 9-12. --Ian Chipman
