Editorial Review

Review

"...it makes you feel smarter with little eureka moments that are real page turners." (Bedfordshire on Sunday, Borough edition, *Sunday 2nd March*)

From the Back Cover

Everything you need for a quick tour of everything

You are here. How come?

Want to discover the physical origin of the universe, but don't have the rest of eternity to read up on it? Want to know what scientists have found out about where you and your planet came from, but without the science blinding you? Most people do: It's a deep part of human nature. Who better than For Dummies to tackle the biggest, strangest, and most wonderful question of them all?

Discover:

- Early ideas about our universe
- The Big Bang and the Big Crunch
- Dark matter, string theory, and time travel
- Explanations of the unexplainable
- If life exists elsewhere

About the Author

Stephen Pincock has been writing about science for the past 15 years, after finishing a degree in Microbiology at the University of New South Wales, Australia, and realising that while the whole science thing is utterly fascinating, he was less than eager to spend the rest of his life peering down a microscope. Stephen's currently a regular science contributor to *The Financial Times* and *The Lancet* among many other publications, and is the international correspondent for *The Scientist*. For quite a while he was an editor at Reuters Health.

Mark Frary is a science and technology writer. He studied astronomy and physics at University College London, writing a dissertation on the production of positronium. While there, he worked at the Mullard Space Science Laboratory on atmospheric plasma physics. After completing his degree, he moved to Geneva and worked on the OPAL experiment at the European particle physics laboratory CERN.

Mark co-wrote the book *You Call This The Future?*, a look at the 50 best sciencefiction gadgets ever conceived and how they have become reality. He lives in Ampthill in Bedfordshire with his wife and two children.

Mark and Stephen are the authors of *Codebreaker: The History of Secret Communication*.

Users Review

From reader reviews:

Eric Bass:

As people who live in the particular modest era should be revise about what going on or info even knowledge to make these keep up with the era which can be always change and move forward.
