## **Biogeography: Introduction to Space, Time, and Life** By Glen MacDonald

Illustrative examples from recent research publications and "classic" studies are prominently featured throughout the book.

Research techniques are highlighted in "special interest" boxes. Illustrations and descriptions of research techniques are provided with examples such as fire-scars from trees used to reconstruct disturbance, fossil pollen used to reconstruct vegetation change and plant migration, transect and quadrat sampling.

Includes key biogeographical theories that link space and time to the distribution of life. Some of these theories include: 1. Ranges, Refugia, Refuges, Corridors, Barriers, 2. Centers of Origins, 3. Cladistics, 4. Variance, 5. Island Biogeography, 6. Diversity Theory, 7. Gap Analysis for Conservation.

## **Editorial Review**

### **Review**

“...a comprehensive and informative text that condenses the diversity embraced by the discipline and aptly represents current biogeographical thinking...” (*Transactions of the IBG*, Vol.29, 2004)

## **Users Review**

### **From reader reviews:**

#### **Mildred Ortiz:**

This book untitled Biogeography: Introduction to Space, Time, and Life to be one of several books this best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit onto it. You will easily to buy this book in the book retail store or you can order it by means of online. The publisher of the book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Mobile phone. So there is no reason for you to past this book from your list.

#### **Deborah Ryan:**

As a university student exactly feel bored for you to reading. If their teacher asked them to go to the library in order to make summary for some guide, they are complained. Just very little students that has reading's heart and soul or real their passion. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading through is not important, boring and can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Biogeography: Introduction to Space, Time, and Life can make you sense more interested to read.

#### **Maria Trussell:**

E-book is one of source of know-how. We can add our information from it. Not only for students but in addition native or citizen need book to know the up-date information of year to be able to year. As we know those textbooks have many advantages. Beside most of us add our knowledge, may also bring us to around the world. Through the book Biogeography: Introduction to Space, Time, and Life we can take more advantage. Don't you to definitely be creative people? Being creative person must prefer to read a book. Just choose the best book that ideal with your aim. Don't possibly be doubt to change your life by this book Biogeography: Introduction to Space, Time, and Life. You can more pleasing than now.

**Sandra Williams:**

A lot of people said that they feel bored when they reading a publication. They are directly felt it when they get a half regions of the book. You can choose the actual book Biogeography: Introduction to Space, Time, and Life to make your own personal reading is interesting. Your own personal skill of reading expertise is developing when you like reading. Try to choose straightforward book to make you enjoy to see it and mingle the feeling about book and studying especially. It is to be 1st opinion for you to like to available a book and study it. Beside that the book Biogeography: Introduction to Space, Time, and Life can to be your brand new friend when you're truly feel alone and confuse using what must you're doing of the time.
