Econometrics and Economic Theory in the 20th Century: The Ragnar Frisch Centennial Symposium (Econometric Society Monographs) From Brand: Cambridge University Press

Ragnar Frisch (1895-1973) received the first Nobel Memorial Prize in Economic Science together with Jan Tinbergen in 1969 for having played an important role in ensuring that mathematical techniques figure prominently in modern economic analysis. This collection explores his contributions to econometrics and other key fields in the discipline, as well as the results of new research. Contributors include eminent scholars from Europe, the United Kingdom and North America who investigate themes in utility measurement, production theory, microeconomic policy, econometrics methods, macrodynamics, and macroeconomic planning.

Editorial Review

Review

"Ragnar Frisch was perhaps the seminal figure in the transformation of economics into a quantitative science, equally at home in modern economic theory and in econometric methodology. A symposium to represent the breadth and depth of his interests faces a daunting task. This one meets the challenge fully, with a combination of expositions of Frisch's work and outstanding new work which show the current importance of Frisch's program." Kenneth J. Arrow, Stanford University
