Pre-Calculus For Dummies By Krystle Rose Forseth, Christopher Burger, Michelle Rose Gilman

Getting ready for calculus but still feel a bit confused? Have no fear. *Pre-Calculus For Dummies* is an unintimidating, hands-on guide that walks you through all the essential topics, from absolute value and quadratic equations to logarithms and exponential functions to trig identities and matrix operations.

With the help of this clear, easy-to-use resource, you'll soon get a handle on all of the concepts — not just the number crunching — and understand how to perform all pre-calc tasks, from graphing to tackling proofs. You'll also get a new appreciation for how these concepts are used in the real world, and find out that getting a decent grade in precalc isn't as impossible as you thought. Discover how to:

- Apply the major theorems and formulas
- Understand quadratic, square-root, absolute value, cubic, and cube-root functions
- Graph trig functions like a pro
- Flip-flop with inverse functions
- Find trig values on the unit circle
- Work with trig identities and advanced identities
- Tackle analytic geometry
- Solve oblique triangles with the laws of sines and cosines
- Use polar coordinates to express points on a plane
- Identify function limits and continuity
- Place vectors on a coordinate plane.
- Rotate and shift conic section forms
- Solve systems with mingling and matrices

If “the fun and easy way to learn pre-calc” seems like an oxymoron to you, order *Pre-Calculus For Dummies* today, and get ready to be surprised!

Editorial Review

From the Back Cover

Brush up on algebra and trig concepts and get a glimpse of calculus

Understand the principles and problems of pre-calculus

Getting ready for calculus, but feel confused? Have no fear! This unintimidating, hands-on guide walks you through all the essential topics, from absolute value and quadratic equations to logarithms and exponential functions to trig identities and matrix operations. You'll understand the concepts — not just the number crunching — and see how to perform all tasks, from graphing to tackling proofs.

- Apply the major theorems and formulas
- Graph trig functions like a pro
- Find trig values on the unit circle
- Tackle analytic geometry
- Identify function limits and continuity

About the Author

Krystle Rose Forseth graduated from the University of California, Santa Cruz, where she majored in mathematics with an emphasis in education. She has been tutoring math for eight years and teaching for three. Currently, she is the head of the math department at Fusion Learning Center and Fusion Academy, where she teaches mathematics and oversees the math instructors. Teaching students math has made Krystle a more compassionate individual, and her enthusiasm for the subject makes learning fun.

Christopher Burger graduated with a Bachelor of Arts degree in mathematics from Coker College in Hartsville, South Carolina, with minors in art and theatre. He has taught math for more than 10 years and tutored math subjects ranging from basic math to calculus for 20 years. Currently, he is the director of independent studies for Fusion Learning Center and Fusion Academy in Solana Beach, California, where he not only teaches students one-on-one, but also writes curriculum, oversees a staff of 35 teachers, and maintains high levels of academic rigor within the school. Christopher takes teaching and connecting with his students very seriously, and he believes he makes a difference not only in their math education, but in their lives.

Michelle Rose Gilman is proud to be known as Noah's mom (Hi, Noah!). A graduate from the University of South Florida, Michelle found her niche early, and at 19, she was working with emotionally disturbed and learning-disabled students in hospital settings. At 21, she made the trek to California, where she found her passion for helping teenagers become more successful in school and life. What started as a small tutoring business in the garage of her California home quickly expanded and grew to the point where traffic control was necessary on her residential street.

Today, Michelle is the founder and CEO of Fusion Learning Center and Fusion Academy, a private school and tutoring/test prep facility in Solana Beach, California, serving more than 2,000 students each year. She is the author of *The ACT For Dummies* and other books on self-esteem, writing, and motivational topics. Michelle has overseen dozens of programs over the last 20 years, focusing on helping kids become healthy adults. She currently specializes in motivating the unmotivated adolescent, comforting their shellshocked parents, and assisting her staff of 35 teachers.

Users Review

From reader reviews:

Thomas Depew:

Do you one among people who can't read pleasurable if the sentence chained within the straightway, hold on guys this specific aren't like that. This Pre-Calculus For Dummies book is readable by means of you who hate the perfect word style. You will find the data here are arrange for enjoyable looking at experience without leaving actually decrease the knowledge that want to deliver to you. The writer involving Pre-Calculus For Dummies content conveys thinking easily to understand by many individuals. The printed and e-book are not different in the content material but it just different such as it. So , do you nevertheless thinking Pre-Calculus For Dummies is not loveable to be your top record reading book?

Diego Mears:

Reading a guide can be one of a lot of activity that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new details. When you read a publication you will get new information due to the fact book is one of a number of ways to share the information or even their idea. Second, examining a book will make you more imaginative. When you reading through a book especially fiction book the author will bring that you imagine the story how the people do it anything. Third, you may share your knowledge to others. When you read this Pre-Calculus For Dummies, you could tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a book.

Chester Grantham:

Reading a reserve tends to be new life style in this era globalization. With examining you can get a lot of information that could give you benefit in your life. Using book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire all their reader with their story or their experience. Not only the storyline that share in the ebooks. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors nowadays always try to improve their expertise in writing, they also doing some research before they write to their book. One of them is this Pre-Calculus For Dummies.

Lorri Nicholson:

What is your hobby? Have you heard that question when you got learners? We believe that that concern was given by teacher for their students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person similar to reading or as studying become their hobby. You have to know that reading is very important and also book as to be the matter. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You get good news or update with regards to something by book. Different categories of books that can you decide to try be your object. One of them is niagra Pre-Calculus For Dummies.
