Handbook of Reflector Antennas and Feed Systems: Volume 2 - Feed Systems (Artech House Antennas and Propagation Library) By Lotfollah Shafai

This is the first truly comprehensive and most up-to-date handbook available on modern reflector antennas and feed sources for diversified space and ground applications. There has never been such an all-encompassing reflector handbook in print, and no currently available title offers coverage of such recent research developments. The Handbook consists of three volumes. Volume 2 focuses on feed sources.

Reflector antennas are extraordinary devices that combine high gain with geometrical simplicity, and can operate in broad frequency bands. Their performance, however, depends on the electrical characteristics of the feed system with which they operate. This comprehensive volume provides you with a solid understanding of feed system theory, design, and analysis.

Featuring chapters authored by experts in each aspect of feed systems, this book takes you from fundamental mathematical techniques, electrically small and large dual reflectors, feed geometry and telemetry, tracking and command antennas, and more. Throughout the book numerous examples are provided to guide you in the practical aspects of feed design.

Handbook of Reflector Antennas and Feed Systems: Volume 2 - Feed Systems (Artech House Antennas and Propagation Library) By Lotfollah Shafai Bibliography

- Sales Rank: #2688199 in Books
- Brand: Brand: Artech House
- Published on: 2013-06-30
- Ingredients: Example Ingredients
- Original language: English
- Number of items: 1
- Dimensions: 1.10" h x 7.20" w x 10.20" l, 2.05 pounds
- Binding: Hardcover
- 450 pages

Editorial Review

About the Author

Lotfollah Shafai is the Canada Research Chair in the Electrical and Computer Engineering Department at the University of Manitoba. He earned his PhD in electrical engineering from the University of Toronto. Satish K. Sharma is an associate professor in the Department of Electrical and Computer Engineering at the San Diego State University. He earned his PhD in electronics engineering from the Indian Institute of Technology (BHU), Varanasi. Sudhakar Rao is a Technical Fellow at Northrop Grumman Aerospace Systems. He earned his PhD in electrical engineering from the Indian Institute of Technology, Madras.

Users Review

From reader reviews:

Loren Hatfield:

Book is actually written, printed, or descriptive for everything. You can learn everything you want by a book. Book has a different type. To be sure that book is important thing to bring us around the world. Next to that you can your reading expertise was fluently. A publication Handbook of Reflector Antennas and Feed Systems: Volume 2 - Feed Systems (Artech House Antennas and Propagation Library) will make you to always be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think in which open or reading some sort of book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you looking for best book or ideal book with you?

Benjamin Munk:

Information is provisions for anyone to get better life, information presently can get by anyone with everywhere. The information can be a knowledge or any news even a concern. What people must be consider if those information which is inside former life are challenging be find than now could be taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you find the unstable resource then you buy it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Handbook of Reflector Antennas and Feed Systems: Volume 2 - Feed Systems (Artech House Antennas and Propagation Library) as your daily resource information.

Refugio Kennedy:

Reading a book can be one of a lot of task that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new information. When you read a publication you will get new information due to the fact book is one of several ways to share the information or maybe their idea. Second, reading a book will make a person more imaginative. When you reading a book especially tale fantasy book the author will bring one to imagine the story how the characters do it anything. Third, you could share your knowledge to some others. When you

read this Handbook of Reflector Antennas and Feed Systems: Volume 2 - Feed Systems (Artech House Antennas and Propagation Library), you are able to tell your family, friends and soon about yours guide. Your knowledge can inspire average, make them reading a e-book.

Michael Blossom:

In this particular era which is the greater man or woman or who has ability to do something more are more valuable than other. Do you want to become among it? It is just simple method to have that. What you should do is just spending your time not much but quite enough to experience a look at some books. One of many books in the top record in your reading list is Handbook of Reflector Antennas and Feed Systems: Volume 2 - Feed Systems (Artech House Antennas and Propagation Library). This book which is qualified as The Hungry Hillsides can get you closer in growing to be precious person. By looking up and review this publication you can get many advantages.
