Knock on Wood: Nature as Commodity in Douglas-Fir Country By W. Scott Prudham

Scott Prudham investigates a region that has in recent years seen more environmental conflict than perhaps anywhere else in the country--the old-growth forests of the Pacific Northwest. Prudham employs a political economic approach to explain the social and economic conflicts arising from the timber industry's presence in the region. As well, he provides a thorough accounting of the timber industry itself, tracing its motivations, practices, and labor relations.

Editorial Review

Review

This book arrived on my desk two days after the U.S. Senate voted down, yet again, legislation that would have begun the process of finally dealing with climate change, albeit in a tiny, timid way. I wish that every member of that chamber could be forced to read this book--to realize that global warming is not some distant threat, but a very present reality. It is a powerful document of witness. -- Bill McKibben, author of *The End of Nature*

About the Author

Scott Prudham is an assistant professor in the geography department at the University of Toronto.

Users Review

From reader reviews:

Ernest Baker:

The book Knock on Wood: Nature as Commodity in Douglas-Fir Country make you feel enjoy for your spare time. You can utilize to make your capable much more increase.
