**Zero Hour (The NUMA Files)** By Clive Cussler, Graham Brown

**Kurt Austin and the NUMA crew must stop a vengeful scientist from tearing apart the very surface of the earth in this fast-paced installment in the #1 *New York Times*-bestselling series.**

It is called zero-point energy—contained in all matter, it would become an unlimited resource for anyone able to tap into it. But so far, no one has. And even if they could, would they be able to contain it? Kurt Austin and his NUMA Special Assignments team are about to find out.

Kurt Austin is attending a symposium in Sydney, Australia, when he meets a stunning theoretical physicist named Hayley Anderson at the Opera House steps. The pair are interrupted by a boat chase raging across the harbor. But when Austin rushes to the scene, he's intercepted by the head of the Australian Security Intelligence Organization.

Asked to step aside, Austin isn't quite ready to let go of the chase, especially when he learns that Ms. Anderson is somehow connected. Disappearing documents and sudden, unexplained earthquakes suggest she may be in trouble. And the clues point to a scientist who may have achieved the impossible, the construction of a zero-point energy machine.

### Editorial Review

#### From Publishers Weekly

This latest NUMA adventure from Cussler and Brown features the heroic members of the National Underwater and Marine Agency—Kurt Austin, Dirk Pitt, Joe Zavala, et al.—battling yet another madman who hopes to conquer the world. But crazed scientist Maxmillian Thero's weapon is unique: it uses of zero-point energy to create machines capable of causing continent-shattering earthquakes. Narrator Scott Brick is skilled at creating accents—a much-needed talent considering that Thero has marked both Australia and Russia as his main targets. Brick treats the book's Aussies, male and female, to a credible, near musical twang. His Russian accents are solid, especially the voice he uses for an oddly likeable Moscow assassin. When it comes to most of the NUMA world-savers, Austin and Pitt included, Brick uses an all-purpose, broadcast-quality stalwart tone, though the down-to-earth Zavala's comments have an added touch of Brooklyn sarcasm. It's the voice of Thero that presents the biggest challenge. The authors describe it as being the result of vocal chords damaged in an intense fire that nearly killed the man and drove him mad. Brick's croak is so effectively garbled and strained one hopes he has his own award-winning voice properly insured against misuse. A Putnam hardcover. (May)

Even if Kurt Austin, of the National Underwater and Marine Agency (NUMA), isn't looking for trouble, it somehow has a way of finding him. Attending a conference in Sydney, Austin just happens to be nearby when a powerboat crashes into the Sydney Opera House. Kurt pulls an injured man out of the wreckage; the man dies but not before muttering a cryptic message ("The heart . . . of Tartarus") that Austin immediately recognizes as a reference to "the deepest prison of the underworld." Then, after Austin notices that the dead man has symptoms of the bends, he starts looking for a mystery deep under the water, but he doesn't expect to find a Bondian megalomaniac who has harnessed the massively destructive power of zero-point energy and is threatening to wreak havoc upon the planet. Unless, of course, Austin and his NUMA team can stop him. The NUMA books are sort of midrange Cussler, not as well crafted as his Isaac Bell series but more exciting than the Oregon Files. Fans of the previous NUMA adventures will find much to enjoy here. -- David Pitt
